Subject: **BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11 REPORT ON COUNTY WATER USAGE, IMPLEMENTATION OF WATER CONSERVATION BEST MANAGEMENT PRACTICES, AND CUSTOMER CONSERVATION IN COUNTY WATERWORKS DISTRICTS AND BOARD MOTION OF MAY 26, 2015, AGENDA ITEM 2 PRELIMINARY REVIEW OF COUNTY CODES AND POLICIES TO REMOVE BARRIERS TO PROPERTY OWNERS SEEKING TO COMPLY WITH THE DROUGHT-RELATED REQUIREMENTS**

Please find two reports with attachments responding to the motions approved by your Board on May 12, 2015, and May 26, 2015, respectively, regarding water conservation in the County. As directed by your Board, staff compiled reports examining water usage at County facilities and in the Waterworks Districts and provides recommendations to support ongoing conservation efforts.

These reports find that year-over-year total billed water consumption by County departments and facilities increased approximately 4% from FY 2013-14 to FY 2014-15. Changes in water consumption by individual County departments varied from a 29% reduction to a 93% increase in water use from FY 2013-14 to FY 2014-15. Total billed water use for each department can be affected by many factors, including changes in occupancy or the opening of new facilities. These reports also find that County departments continue to implement water conservation best management practices (BMPs) to address the need for increased conservation in response to the Governor's April 1st Executive Order mandating a statewide 25% reduction in potable water use. As the Water Board's emergency regulations did not take effect until May 18, 2015, conservation actions taken by County departments in response to the Executive Order have had one month or less to impact the FY 2014-15 totals.

Regarding the County Waterworks Districts, these reports find that customers of the County Waterworks Districts have achieved significant water savings in response to the Water Board's emergency regulations. The Water Board recently recognized the "remarkable performance" of the LA County Waterworks District No. 40, Antelope Valley, in exceeding its water use reduction goals. Public Works continues to conduct outreach to customers and examine potential policies and incentive programs to support customer conservation efforts.

To address the need for additional water conservation at County facilities, staff recommends your Board consider the following actions to address the four previously identified water conservation BMPs:

1. Direct County departments to reduce potable water use for irrigation through the following measures:
 - Direct County departments to immediately stop the use of potable water for irrigation of ornamental, non-recreational turf at all County facilities and allow these areas to "fade to gold." Steps must be taken to ensure the health of any trees that may be affected by this measure.
 - Prohibit the installation of new ornamental turf at all County facilities unless non-potable water is used for irrigation, excepting parks and other recreational facilities, and require that all new ornamental landscaping be of drought-tolerant plants.
2. Direct County departments to replace all noncompliant plumbing fixtures in County-owned buildings by January 1, 2019, in alignment with the commercial property requirements of SB-407, codified in California Civil Code §1101.1-1102.155.
3. Direct all County departments to upgrade water treatment systems to conserve water in cooling towers, if applicable.
4. Direct the Countywide Sustainability Council to implement a Countywide behavioral water conservation program with an emphasis on signage addressing the water conservation BMP areas outlined in this memo.

In addition, Staff recommends your Board consider:

- Direct the CEO to investigate external funding and providing seed funding for a Water Revolving Loan Fund (RLF) to be administered by ISD, similar to the existing fund provided for energy efficiency. These reports describe a number of water efficiency projects at County facilities that would benefit from a Water RLF with an allowed payback period of 10 years.
- Direct the Countywide Sustainability Council to communicate these mandates to all departments and work with the Departments that have not yet met the reduction

Each Supervisor
August 11, 2015
Page 3

targets specific to that facility and report back within 60 days on the progress of their implementation.

Future reporting on the implementation of water conservation and efficiency programs across the County and in County operations shall be coordinated by ISD with the Countywide Sustainability Council, as part of its mandate to develop and maintain environmental sustainability programs, lead efforts to find funding for such programs, and provide reports on the progress and accomplishments of these programs to the Board.

The findings and recommendations summarized above are detailed in the attached reports and supporting documents responding to the motions approved by your Board on May 12, 2015, and May 26, 2015, respectively.

If you or your staff have any further questions please contact Aaron Klemm from ISD at (323) 881-3971, via email aklemm@isd.lacounty.gov or Gary Hildebrand from Public Works at (626) 458-4012, via email ghildebrand@dpw.lacounty.gov.

County Sustainability Leadership Council

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11

REPORT ON COUNTY WATER USAGE, IMPLEMENTATION OF CONSERVATION
BEST MANAGEMENT PRACTICES, AND CUSTOMER CONSERVATION IN
COUNTY WATERWORKS DISTRICTSIntroduction

In May 12, 2015, your Board approved a motion calling for an evaluation of the County's collective compliance toward reducing water consumption in support of the statewide 25% reduction mandate. This motion:

1. Directed County departments to report to ISD and CEO Budget water usage for each department by County facility for FY 2013-14 and FY 2014-15 and assess each department's progress toward an overall 25% countywide conservation goal.
2. Directed ISD to report on the status of implementing water conservation best management practices (BMPs) at County facilities, and also to report on additional BMPs that could be implemented, their economic viability, and acceptable financing mechanisms.
3. Directed the Waterworks Districts to report on the response of the Districts' customers to the SWRCB Emergency Regulations and the level of water conservation achieved in the Districts in FY 2014-15.
4. Directed Public Works, through its leadership role in the Integrated Regional Water Management Program, to encourage coordinated, multi-lingual messaging among water agencies throughout the County on the impacts of the drought and measures to be taken by residents to comply with the State Water Resources Control Board actions.

This motion by your Board recognizes that the ongoing, historic drought presents new and significant challenges in managing County facilities and resources. Due to climate change, periods of extended or severe drought are expected to be the "new normal" for California, and County departments must adapt their practices to these new conditions. The Governor's April 1st Executive Order and subsequent emergency water use regulations from the Water Board are already affecting County facility operations as detailed in ***Attachment 1***.

This report illustrates that while County residents have achieved significant water savings in response to the Water Board's emergency regulations, few County departments or facilities have made substantial progress towards conservation goals.

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11

1. County Water Use FY2013-14 and FY2014-15

Water utility billing for County facilities is processed by three departments: Internal Services Department (ISD), Department of Parks and Recreation (DPR), and Department of Public Works (DPW). ISD processes water utility bills for all County departments and facilities except for DPR and DPW. The following table shows total water consumption reported for FY 2013-2014 and FY 2014-2015. Water use is reported in billing units of a hundred cubic feet (CCF). 1 CCF is equal to approximately 748 gallons

Reporting Department	Water Usage FY13-14 (CCF)	Water Usage FY14-15 (CCF)	Change FY13-14 to FY14- 15 (CCF)	% Change FY13-14 to FY14- 15
Department of Parks and Recreation	2,902,080	3,182,108	280,028	10%
Department of Public Works	258,723	183,227	-75,496	-29%
ISD (all other billed water use for County Depts)	2,856,925	2,878,412	21,487	1%
TOTALS:	6,017,728	6,243,747	226,019	4%

According to the data provided to ISD, overall billed County water consumption increased 4% from FY 2013-14 to FY 2014-15. Changes in water consumption by individual County departments varied from a 29% reduction to a 93% increase in water use from FY 2013-2014. Total billed water use for each department can be affected by many factors, including changes in occupancy or the opening of new facilities. A summary of each department's progress towards a 25% conservation goal is included in **Attachment 2**, and a full breakdown of water use by department and facility can be found in **Attachments 3-5**. As the Water Board's emergency regulations did not take effect until May 18, 2015, conservation measures taken by County departments in response to the Executive Order have had 1 month or less to impact the FY 2014-15 totals.

The reported water usage totals include both potable and non-potable water usage, as the County's billing system does not distinguish between potable and non-potable accounts. Only potable water use is subject to the Water Board's emergency regulations.

2. Water Conservation BMPs and Acceptable Financing Mechanisms

The following section summarizes the status of current and potential BMPs as reported to ISD, DPR, and DPW. A full table summarizing the implementation status of water conservation BMPs at all County departments can be found in **Attachment 6**, which is an updated version of the report on water conservation implementation provided in response to the Board's April 7, 2015, motion requesting this information.

Current Status of Water Conservation BMPs

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11

ISD completed 50,000 square feet of turf conversion projects at County facilities in June 2015 that replaced ornamental turf grass with drought-tolerant landscaping. These projects have an estimated combined annual water savings of 1.7 million gallons. ISD is currently reviewing bids to upgrade the cooling tower water treatment systems at three central-plant facilities. Similar upgrades to the water treatment system at the Civic Center cogeneration plant cooling towers resulted in approximately 30 million gallons and \$750,000 in annual savings. In addition, the Countywide Sustainability Council (CSC) has developed the scope of work for an outreach program for County facilities to promote awareness of water conservation BMPs and achieve savings from behavioral changes.

DPR reports that 14 parks and 7 golf courses are currently using recycled water instead of potable water for irrigation, and the department has identified an additional 19 parks and 2 golf courses that could be converted to recycled water if the existing utility-owned recycled water infrastructure is extended.

DPW reports that the department has conducted water use surveys of many of their managed facilities, which confirmed that all turf irrigation systems have been turned off at facilities and all public street medians as required by the Governor's April 1st Executive Order. These surveys identified approximately 70 toilets that could be replaced with high efficiency fixtures, 15,000 square feet of non-recreational turf area that could be replaced with drought-tolerant landscaping, and 150 sprinkler heads that could be replaced with drip irrigation or more efficient spray heads. The department is in various stages of implementing these recommendations. In addition, DPW is investigating opportunities to replace existing potable water uses with recycled water where appropriate.

Potential Water Conservation Projects and Economic Viability

ISD developed and distributed a survey requesting information on facility water consumption and equipment status with regard to plumbing fixtures, cooling towers, and landscape irrigation to identify potential water conservation opportunities at County facilities. To date, ISD has received survey responses covering 48 facilities across 10 departments. 34 of these facilities are County-owned. A cost-benefit analysis of the potential water savings at the County-owned facilities is in the following table:

Project Area	Est. Annual Water Savings (Million Gallons)	Estimated Net Project Cost	Est. Annual Cost Savings
Plumbing Fixtures	23.31	\$2,895,800	\$215,265
Cooling Towers	20.30	\$550,000	\$166,591
Landscaping	10.51	\$2,718,038	\$47,215
Totals:	54.12	\$6,163,838	\$429,071

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11

The estimated net project cost takes into account rebates for water-efficient plumbing fixtures and turf replacement currently offered by water agencies. ISD identified a total of 7 water conservation projects at 6 different sites with a payback of 5 years or less based on annual savings from avoided water costs. There were 14 projects with a payback of 10 years or less. A full summary table of these projects can be found in ***Attachment 7***.

These results were used to estimate the potential savings across all County-owned facilities in ISD's utility billing portfolio. County-owned buildings account for 89% of total ISD-billed water use. There is no current inventory of non-recreational turf grass at County facilities; therefore potential savings from turf conversion and irrigation upgrades are not included in the estimates in the following table:

Project Area	Est. Annual Water Savings (Million Gallons)	Est. Annual Water Savings (%)	Estimated Net Project Cost	Estimated Annual Cost Savings	Simple Payback (years)
Plumbing Fixtures	95-180	5-10%	\$12,000,000	\$700,000	17.1
Cooling Towers	100	5%	\$2,500,000	\$1,000,000	2.5
Totals:	195-280	10-15%	\$14,500,000	\$1,700,000	8.5

This analysis suggests that upgrading older, less efficient plumbing fixtures and installing advanced water treatment systems for cooling towers could achieve a 10-15% savings in total annual water use for County-owned facilities at a cost of approximately \$14.5 million.

Acceptable Financing Mechanisms

The CSC has identified several potential funding sources for water conservation projects in addition to the cost offsets provided by water agency rebates:

DWR Water-Energy Grant Program

The Department of Water Resources Water-Energy Grant Program provides funds to implement water efficiency programs or projects that reduce greenhouse gas emissions through water and energy conservation. The emergency drought response package signed by the Governor in March 2015 allocated an additional \$19M in Cap and Trade funds to the DWR Water-Energy Grant Program to be made available for projects over the next 3 fiscal years.

Water Bond Funds

\$7.5B in voter-approved water bond funding will be disbursed by state agencies for grant and loan programs to fund water infrastructure projects. The County intends to partner with water districts where possible to use available water bond funds to complete water conservation infrastructure projects that will support County conservation efforts.

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11*Water Conservation Revolving Loan Fund (RLF)*

The CSC proposes the creation of a revolving loan fund to finance water conservation and drought-resiliency projects at County facilities. This RLF will be modeled after the ISD-managed RLF (using remaining ARRA funding) for energy efficiency projects, which provides a loan to ISD customers for capital costs of energy efficiency projects that is paid back through the resulting annual utility bill cost savings. An allowed payback period of up to 10 years would be sufficient to fund a significant number of potential water efficiency projects identified by ISD, and extending the payback period to 15 years could fund an even greater number of projects. If your Board approves the creation of the RLF, seed funding is requested for the fund.

Recommendations

As detailed above, the current implementation of water conservation best management practices has been insufficient to achieve desired conservation levels. Without a significant change to business-as-usual policies and practices, most County facilities are unlikely to achieve measurable water conservation. In the absence of budget augments to fund water conservation projects, achieving substantial water conservation will require significant, potentially painful behavioral changes on behalf of County departments. Facility improvements such as plumbing fixture or cooling tower upgrades that cause little disruption to County operations or behavior will require financial commitments. Meeting the substantial but necessary water use reduction targets set by both your Board and the Governor will likely require a combination of these two types of strategies. Therefore, the CSC recommends that your Board:

- **Direct County departments to reduce potable water use for irrigation through the following measures:**
 - **Order County departments to immediately stop irrigation of ornamental, non-recreational turf at all County facilities and allow it to “[fade to gold](#).”** This is a very visible way for the County to demonstrate support of statewide water conservation efforts and allow valuable water resources to be directed to parks and other facilities that provide a greater community benefit. This measure would save an average of 50 gallons of water per square foot of unirrigated turf grass annually.
 - **Prohibit the installation of new ornamental turf at all County facilities, with the exception of parks and other recreational facilities, and require that all new landscaping at such sites be of low-water-use plants in accordance with the State’s recently amended Model Water Efficient Landscape Ordinance (MWELO).**

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11

The updated MWELo effectively prohibits the installation of new ornamental turf at commercial, institutional, and industrial properties through strict Maximum Applied Water Allowances (MAWA) for new and rehabilitated landscapes. Adhering to the MAWA requirements at County facilities in advance of the November 1, 2015, deadline will increase water savings and demonstrate a strong commitment to water conservation.

- **Order County departments to replace all noncompliant plumbing fixtures in County-owned buildings by January 1, 2019, in alignment with the commercial property requirements in SB-407, which is codified in California Civil Code §1101.1-1102.155.** As defined by SB-407, noncompliant plumbing fixtures are any toilet using more than 1.6 gallons per flush, any urinal using more than one gallon per flush, any showerhead with a flow capacity of more than 2.5 gallons per minute, or any interior faucet that emits more than 2.2 gallons per minute. As detailed in the previous section, CSC estimates that this measure could save approximately 5-10% of total ISD-billed County water use, or 95-180 million gallons of water annually, at a cost of approximately \$12M.
- **Order all County departments that maintain cooling towers to upgrade water treatment systems to conserve water.** As detailed above, CSC estimates that performing similar upgrades at all County-owned cooling towers could save approximately 100 million gallons annually, or 5% of total ISD-billed water use, at a cost of approximately \$2.5M. CSC estimates that these cooling tower upgrades have a combined annual savings of \$1M in avoided water costs.
- **Direct the Countywide Sustainability Council to implement a Countywide behavioral water conservation program with an emphasis on signage addressing the 4 water conservation BMP areas outlined in this memo.** This outreach campaign will furnish County facilities with signage and messaging that will encourage staff, patrons, and visitors to conserve water and increase awareness of the accelerating drought. This program is expected to achieve water savings through behavioral changes and make residents aware of actions taken by the County to save water, such as reduced irrigation of ornamental turf.

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11**3. Waterworks Districts Report**

The customers of the Los Angeles County Waterworks Districts have achieved significant water savings in the last 12 months as shown in the comparison tables provided in **Attachment 8**. The amount of water used by customers in each District was down between 10 and 20 percent in Fiscal Year 2014-2015 compared to what was used in Fiscal Year 2013-2014.

In response to Governor Brown's Executive Order and subsequent regulations issued by the State Water Resources Control Board (SWRCB), the Districts implemented the Phased Water Conservation Plan (PWCP) in all service areas beginning in June 2015. The SWRCB regulations imposed mandatory conservation levels of 36% and 32% for District No. 29 (Malibu) and District No. 40 (Antelope Valley), respectively, from 2013 supply levels. Outdoor watering restrictions of 2 days per week were put in place in District Nos. 21, (Kagel Canyon, 36 (Val Verde), 37 (Acton) and the Marina Del Rey Water System. The Districts have seen an increase in customer interest in water conservation device rebates, turf removal rebates, and water use audits to help meet the required reductions.

Public Works staff members have also attended community meetings to explain the actions the Districts have taken in response to the Governor's Executive Order and to promote water conservation programs. The amount of water conserved during May and June 2015 is between 20 and 40% in each of the Districts compared to what was used in these months during 2013. The most recent water conservation numbers reported to the State for each Waterworks District can also be found in **Attachment 8**. Although water use in Marina del Rey has remained fairly constant, it should be noted that compared to the base period of 1995-2004, as defined by the Water Conservation Act of 2009 (SBX7-7 or "20 by 2020"), water use has been reduced by over 20% even though per capita water use is already very low in Marina del Rey.

4. Encouraging Coordinated, Multi-lingual Messaging

In May 2015, Public Works staff contacted the larger water agencies serving Los Angeles County to compile a summary of the multi-lingual messaging that has been provided to County residents regarding the drought. At the May 27 and June 22, 2015, Greater Los Angeles County (GLAC) Integrated Regional Water Management (IRWM) meetings, Public Works staff provided a summary of this information and encouraged all who participate to provide the various messaging and outreach efforts their agencies and organizations have done regarding the drought. Public Works staff compiled all the information received **Attachment 9** and is providing this information back to water agencies in Los Angeles County to use in ensuring standardized multi-lingual drought messaging. While water agencies are providing common messaging to their customers regarding the statewide water use requirements and restrictions, each agency adds

BOARD MOTION OF MAY 12, 2015, AGENDA ITEM 11

messaging that is specific to the levels of reduction they are required to meet and the restrictions they have placed on their customers to meet the reduction requirements.

Integration of Reduced Water Consumption Activities into the Countywide Sustainability Policy

Creation of the Countywide Sustainability Council (CSC) was approved by your Board on June 30, 2015, which provides coordination of Countywide programs and initiatives related to sustainability. One immediate action was the expansion of the existing water conservation task force, which at the time of the report has already held 4 meetings including representatives from 11 departments. The CSC shall continue the design and implementation of water conservation and efficiency programs across the County and in County operations and provide updates to your Board on the effectiveness and results of those programs.

BOARD MOTION OF MAY 26, 2015, AGENDA ITEM 2**PRELIMINARY REVIEW OF COUNTY CODES AND POLICIES TO
REMOVE BARRIERS TO PROPERTY OWNERS SEEKING TO
COMPLY WITH THE DROUGHT-RELATED REQUIREMENTS**

On May 26, 2015, Supervisor Don Knabe introduced a motion that was approved by the Board instructing the Interim Chief Executive Officer, Directors of Planning and Internal Services, and the Interim Director of Public Health to undertake the following actions:

- Review County Codes, policies, and programs that may be reformed or need to be reformed to reduce the regulatory barriers to property owners seeking to comply with the Water Conservation Plan and drought-related requirements.
- Identify incentive programs and regulatory changes that can be explored to encourage water conservation, stormwater and graywater capture on individual properties, and the potential for eventually connecting these sources to a larger infrastructure system within the County.

Review of County Codes, Policies, and Programs

Property owners seeking to reduce their water use to comply with the current drought-related requirements have expressed interest in three primary methods: graywater reuse, capturing and reusing rainwater, and turf removal. Contrary to the commonly held view, there are minimal regulatory barriers for graywater reuse. No permits are required from the County of Los Angeles for residents to install graywater systems in one- or two-family dwellings as long as these systems are supplied by only clothes washers and the system meets minimum design requirements of the 2014 County of Los Angeles Plumbing Code and regulations set by the Department of Public Health. Information on Public Health design requirements is available on Public Health's website and links to this information have been added to the following websites: Public Works' Building and Safety website, lacountydrought.com, green.lacounty.gov, and the Waterworks Districts' webpage. Residents who wish to reuse graywater from bathroom sinks and showers must prepare simple plans for review by Public Health and Public Works to ensure there are no cross connections between their potable water systems and the graywater system from these sources.

Permits from the County are not required to install and use rain barrels to capture and reuse rainwater on private property. The Metropolitan Water District of Southern California, the regional water wholesaler for the majority of the County, provides a \$75 rebate for purchasing and installing rain barrels. Residents desiring to add more elaborate structures, such as cistern fence systems to capture larger amounts of rainwater, are required to obtain a building permit to ensure the structures meet seismic and safety requirements.

Turf removal is, by far, the most effective means to reduce water use since 50-70 percent of water use is outdoors. A handbook entitled "The Drought Tolerant

BOARD MOTION OF MAY 26, 2015, AGENDA ITEM 2

Garden" has been compiled to assist property owners with planting climate-appropriate landscaping, along with resources about planting zones, invasive species, and water-efficient turf. This information is available on the Green LA County website <http://green.lacounty.gov>. Property owners who wish to remove turf and replace it with drought tolerant landscaping are not required to obtain a permit to do so if the area they are converting is less than 5,000 square feet.

Recent state legislation has also enabled property owners to reduce or eliminate landscape irrigation during periods of drought without facing fines. Governor Brown signed a bill on July 13, 2015, that prohibits local governments from issuing fines to residents for violations of "lawn maintenance" ordinances during a declared drought. Homeowners associations had already been prohibited from issuing these types of fines by a previous bill signed on July 21, 2014.

Potential Incentive Programs and Regulatory Changes

The following is a list of recommendations for incentive programs and regulatory changes to reduce potable water use on individual properties through water conservation, stormwater capture, and graywater use. These actions work best on an individual property basis due to the significant cost to build a new infrastructure system in the County.

- Public Works, Regional Planning, and Internal Services will update their websites to direct residents and businesses to the rebate programs provided by the water agencies serving the County of Los Angeles for removing turf, capturing rainwater, and installing water conservation devices.
- Public Works and Regional Planning will make the changes adopted by the State to the Model Water Efficient Landscape Ordinance that will become effective on December 1, 2015, and readily available to homeowners to promote water conservation and not overburden them with regulatory hurdles.
- Regional Planning and Internal Services will develop consolidated lists of drought-tolerant plants and approved permeable, non-irrigated landscaping (rock, artificial turf, mulch, etc.) options for each hydrologic region in the County that residents can easily access on-line and use when redesigning landscaping at their home.

If you have any questions regarding this report, please contact me or your staff may contact Adam Ariki at (626) 300-3300 or aariki@dpw.lacounty.gov.

Attachment 1 - Impact of State Conservation Mandate on County Facilities

State Water Conservation Mandate and Water Board Regulations

The May 12, 2015, motion by the Board of Supervisors identifies the need for an overarching framework for water conservation efforts at County facilities in response to the Governor's April 1st Executive Order. The Executive Order calls for a statewide 25% reduction in potable water use through February 28, 2016, compared to calendar year 2013. In response, the State Water Resources Control Board (Water Board) assigned mandated conservation tiers to each urban water supplier ranging from 8% to 36%, based on past conservation efforts and current residential per capita usage. Smaller water suppliers that do not fall under the reporting requirements for urban water suppliers were given a 25% reduction mandate. Each water supplier must determine what strategies and water use restrictions to implement in order to achieve the mandated conservation level.

County facilities are located in 110 different service districts served by 83 water suppliers, each assigned a mandated conservation tier by the Water Board. The following chart shows the distribution of County facilities and water utility accounts across the different mandated conservation tiers for their respective water service districts.

The impact of the Executive Order on County facilities varies due to the differences in regulation of water use at the customer level across these 110 water service districts. At this time, water suppliers that serve County facilities have implemented a variety of usage restrictions and rate structures designed to achieve their conservation goals. These strategies generally fall into three major categories:

- Mandatory water use restrictions, including reduced irrigation schedules and general prohibitions against water waste
- Rate increases or a drought surcharge added to all water usage

- Mandatory curtailment (“water budgets”) for each customer with a surcharge for exceeding the allowance

The following table illustrates the percentage of County facilities or utility accounts that are located in districts with each of the three categories of conservation strategies.

Type of Conservation Strategy	# of Facilities Affected	% of Facilities Affected
Mandatory use restrictions only (reduced irrigation, etc.)	851	69%
Rate increases or drought surcharge on all water usage	136	11%
Mandatory curtailment/ “water budget”	254	20%

Currently, only 12% of water service districts, supplying 21% of County facilities, have implemented mandatory curtailment at the customer level. The majority of water suppliers have chosen to meet their state-mandated reduction target through water use restrictions such as reduced irrigation schedules and general prohibitions against water waste as well as voluntary conservation measures taken by customers. As of June 2015, 56% of water service districts that provide water to County facilities were in compliance with their conservation targets.

Additionally, commercial and institutional properties served by smaller water suppliers are required by the Water Board to immediately either limit landscape irrigation with potable water to no more than 2 days per week or reduce potable water usage 25% compared to the same period in calendar year 2013. County facilities with self-supplied water (on-site wells) are also subject to this requirement from the Water Board. Currently 73 County facilities or accounts, or 6% of the total, are subject to these requirements. All ISD-managed sites in small water districts are currently in compliance with the landscape irrigation restrictions.

Financial Impact on County Water Costs

ISD also estimated the financial impact of drought surcharges and fines on water expenditures in its facility billing portfolio if the County does not achieve its conservation goals. Currently only 12% of water districts have implemented drought surcharges or fees. However, 43% of water districts have water shortage contingency plans that include potential mandatory curtailment and surcharges that could be implemented at the discretion of the water district. Assuming these surcharges and fines last only through the end of the Governor’s emergency order, the current overage surcharges and increased rates translate to a 1.6% increase in total annual ISD-billed expenditures on water for FY 2015-2016 compared to FY 2014-2015. The following chart displays the economic impact of current and potential drought surcharges on the annual cost of water at ISD-billed County facilities if water usage continues at current levels:

Economic Impacts of Drought Surcharge Scenario on ISD-billed Facilities	Total annual expected cost increase	% of total annual water charges
Currently imposed surcharges or fines	\$185,900	1.6%
Potential surcharges at minimum level	\$244,300	2%
Potential surcharges at maximum level	\$340,300	3%

The impact of these surcharges and fines is uneven across County facilities and departments; while most facilities do not currently have any projected increase, some facilities may experience up to a 45% increase in the cost of water from the previous fiscal year if water usage continues at current levels.

Challenges in Complying With State Mandates

Because the Governor's Executive Order and the Water Board mandated different conservation levels for each water district and delegated responsibility for compliance strategies to the water district level, this has resulted in 110 different sets of water use regulations at the customer level that affect various County facilities. These regulations include different restrictions on landscape irrigation days and times, different prohibitions on water use, and in some cases, mandated conservation levels based on facility-specific water budgets. In most cases, these regulations have been communicated by the water districts through utility bill inserts, which are sent to Finance and not directly to the facility subject to the water use restrictions. ISD is communicating relevant restrictions to the appropriate Departments.

Attachment 2 – County Water Use FY 2013-14 and FY 2014-15

The following table is a summary of the total billed water use for each department in FY 2013-14 and 2014-15 and an assessment of the conservation level achieved compared to the baseline of FY 2013-14. Water use is reported in billing units of a hundred cubic feet (CCF). 1 CCF is equal to approximately 748 gallons. **Attachments 3-5** provide a detailed report of County water use by department and facility as requested by your Board's motion on May 12, 2015.

Department	Water Use FY2013-14 (CCF)	Water Use FY2014-15 (CCF)	% Change
Agricultural Commissioner/Weights & Measures	6,771	6,400	-5%
Alternate Public Defender	5,975	6,644	11%

Summary of Implementation of Water Conservation BMPs by County Departments

The departments submitted their reports on actions taken to conserve water to CEO in a variety of formats that exceeded 60 pages in length. CEO requested ISD to consolidate these individual reports into a more concise format. The report describes the number and types of actions by department into the respective best practice categories and unique water conservation measures. The final column in the table identifies potential actions the departments are considering in response to the ongoing drought.

- Plumbing fixture measures consist of but are not limited to the upgrade of faucets, aerators, showerheads, toilets, urinals, in County Facilities.
- Landscape fixture measures consist of but are not limited to shut down of recirculating fountains, upgrades of all or part of irrigation systems, upgrades to weather based irrigation controllers, increases of the mowing height, replacement of turf grass with drought tolerant landscapes, retro-commission activities of irrigation systems to catch and correct overspray, breaks and controller malfunctions.
- Cooling Tower measures are not applicable to every department or site. They are typically at the larger facilities with a central heating and cooling plant as opposed to facilities heated and cooled by roof top units, which do not include cooling towers. The water conservation measure utilizes advanced chemical treatment of the cooling tower water instead of frequent replacement of the water to control water chemistry.
- Behavioral water conservation measures consist of signage, newsletter articles, community based social marketing messages to conserve water, employee training, dashboards showing water consumption compared to goals and head to head competitions between facilities to conserve water.

Unique or noteworthy water conservation measures are typically unique to that department's mission or do not fit into the 4 best practice categories.

✓ = Measure/project established at one location.

Attachment 6

County Department	Plumbing Fixture Measures completed	Landscape Measures completed	Cooling Tower Measures completed	Behavioral Measures completed	Unique and/or Noteworthy Measures	Potential Future Actions under consideration
Agricultural Commissioner/ Weights & Measures		✓✓	N/A		<ul style="list-style-type: none"> • Monitor 56 field staff that must fill and re-bait McPhail traps on a daily basis, ensuring only use of appropriate water volumes, as mandated by the California State Trapping Manual and Federal guidelines. 	<ul style="list-style-type: none"> • ACWM plans to reduce watering of landscape to 4 days a week at the Arcadia and South Gate offices, as well as the Pico Rivera Warehouse
Alternate Public Defender			N/A			<ul style="list-style-type: none"> • Install high efficiency water faucets, where allowed under its lease terms. • Place County signage that reminds its employees to monitor water usage. • Generate a recurrent email blast to all of its employees informing them of the drought and reminding them save water
Animal Care and Control			N/A		<ul style="list-style-type: none"> • Transitioned to dry pick-up of fecal matter in the kennels, previous method required excessive use of water. • Implemented use of a new disinfectant in the kennels that requires a lower dilution rate than previous disinfectants; does not require washing off. 	<ul style="list-style-type: none"> • Remove 60% of the landscaping in the perimeter of the administrative HQ building • Replace the heads on the existing irrigation system with efficient spray heads • Install low-flow aerators on all faucets in the administrative HQ building and other efficient fixtures.
Assessor			N/A		Pending	Pending

Los Angeles County Waterworks Districts and Marina Del Rey Water System

Percent Conservation Achieved in response to the
State Water Resources Control Board Regulations

District	Fiscal Year 2014/15 Use (acre-feet)	Fiscal Year 2013/14 Use (acre-feet)	% Reduction
21, Kagel	55	63	13%
29, Malibu	7,840	8,720	10%
36, Val Verde	1,090	1,310	17%
37, Acton	2,440	2,990	18%
40, Antelope Valley	44,930	51,190	12%
MDR*	1,380	1,380	0%

*No change observed in Marina del Rey Water System, which already has low per capita water use.

Percent Conservation Achieved by Month in response to the
State Emergency Conservation Regulation
(as compared to 2013)

District	% Conserved in May 2015	% Conserved in June 2015	District Target
21, Kagel	21%	26%	-
29, Malibu	20%	24%	36%
36, Val Verde	40%	28%	-
37, Acton	36%	39%	-
40, Antelope Valley	22%	42%	32%
MDR	0%	1%	-

Multi-Lingual Outreach Efforts in Los Angeles County

2015 Statewide Drought

Agency	Type	Details
Los Angeles County Waterworks Districts	Notices, website, social media	<ul style="list-style-type: none"> - Outdoor watering restrictions notice, dual sided in English and Spanish (Aug 2014) - Outdoor watering restrictions notice, with phone number for Spanish speakers (May 2015) - Phased Water Conservation Plan notice, with phone number for Spanish speakers (May 2015) - Website (http://lacwaterworks.org) translated in various languages, powered by Google Translate. Contains info on phased water conservation plan, rebates, water saving tips, drought information - Encourage conservation using Twitter and Next Door
Las Virgenes Municipal Water District	Notices	<ul style="list-style-type: none"> - Most drought materials are in both English and Spanish, including various landscaping restriction and irrigation restriction notices.
City of Paramount	Notices, website, social media	<ul style="list-style-type: none"> - Drought conservation newsletter, English only (July 2015) - Mandatory watering restrictions notice, in English and Spanish - Drought and conservation info on the City website (http://www.paramountcity.com) - Conservation messages posted on Twitter and Instagram accounts
City of Burbank	Customer Service	<ul style="list-style-type: none"> - Multi-lingual calls are transferred to multi-lingual representatives to answer questions.
City of Glendale	Mail Notice	<ul style="list-style-type: none"> - Notice initially sent in English regarding Phase III Conservation Plan, tips on saving water, watering schedule, rebate program. Multilingual (Armenian, Korean, Spanish) version sent at customer's request.
City of Long Beach	Flyers	<ul style="list-style-type: none"> - Flyers sent out including translations in Khmer, Tagalog, and Spanish. Also sent emails and voicemails to customers in English.
San Gabriel Valley Water Association	Website, ads	<ul style="list-style-type: none"> - Website (http://www.sgvwa.org) with info, conservation tips, and "Water Widget" - Conservation graphics/ads for TV and publications, "Make the Cut, Reduce Your Use" campaign
Los Angeles Department of Water and Power	Website, notices	<ul style="list-style-type: none"> - Website (http://www.ladwp.com/water) is multilingual, link on top right toggles between English and Spanish. - "Documents" link on website (http://www.ladwp.com/wc) for various notices/documents - Water Conservation Tips flyer in English and Spanish
City of Santa Monica	Website, notices, ads	<ul style="list-style-type: none"> - Drought info on website (http://water.smgov.net/) - "There are easier ways to save water" ad slogan - Door hanger tips, magnets, window cling, etc.
Metropolitan Water District of Southern California	Outreach campaign	<ul style="list-style-type: none"> - Regional, multi-lingual, multi-generational outreach campaign uses TV, radio, social media, etc. "It's everyone's turn", "Take your turn", "Turn if off" in English, Spanish, Vietnamese, Mandarin, and Korean (http://bewaterwise.com/campaign-ads.html) - YouTube conservation video (http://youtu.be/EJubXGOWQs)
The Bay Foundation	Public Service Announcements, social media, flyers	<ul style="list-style-type: none"> - "Desert Delivery" https://youtu.be/IC3yX253Y2k - "Pretend" https://youtu.be/kLvz5HtvGcs - Rain Garden "How-to" video https://youtu.be/yG94TuZWUDw - Twitter and Facebook posts to encourage water conservation - Paperless flyers/notices with Quick Response (QR) codes
Water Replenishment District of Southern California	Drought messages, tips, and website links	<ul style="list-style-type: none"> - Using the phrase "As we head into the driest months of summer, we need to remember to do our part to conserve water during this historic drought." - http://www.wrd.org/conservation - http://www.ecogardener.org - http://www.youtube.com/watch?v=niCY3FWi8NI&feature=youtu.be_gdata_player
West Basin Municipal Water District	Drought talking points, billboard artwork	<ul style="list-style-type: none"> - Developed drought talking points with timelines, West Basin's actions in response to drought, and conservation tips - Water conservation billboard artwork, "Water, use only what you need"
Golden State Water	Mail Notice and Website	<ul style="list-style-type: none"> - Started sending mail notices (with Spanish translation) regarding water-use regulations on June 1. The website has information regarding Staged mandatory water conservation and rationing, Tips on saving water, Watering Schedule, Rebate program.
Upper San Gabriel Valley Municipal Water District	Drought talking points	<ul style="list-style-type: none"> - Drought talking points about the current Drought and water conservation tips
